

WATER SERVICE LINE INVESTIGATION FIELD WORK NOTICE

Water service line investigation field work is scheduled to occur in your area from May 2025 through October 2025.

The first component involves excavation (digging) to expose and inspect water service line piping located in the right-of-way (this may include grass areas, sidewalk, driveways, and portions of the road) fronting selected residences. All areas disturbed during this process will be backfilled immediately and will be restored to their former condition within a month of excavation. This may temporarily impact access to driveways, sidewalks, and/or parking areas. Disruption to your water & sewer service is not anticipated but is a possibility.

The second component involves accessing your basement and water meter to inspect and document your incoming water service line if we don't have records indicating your water service line material. A field representative may knock on your door requesting access to your your meter.

This work is being completed to meet federal and state requirements to create an inventory of Village of Penn Yan water service line materials to determine the presence of, lead pipes, if any. This inventory does not include service line materials beyond your water meter.

Larson Design Group and Casinella Excavation will be assisting Village of Penn Yan Department of Public Works (Water & Sewer Department) with this effort.

If you have any questions or concerns, please contact:

Email: dpw@villageofpennyan.com or call us at: (315) 279-6535

The Village of Penn Yan Department of Public Works sincerely apologizes for any inconvenience. We greatly appreciate your patience and understanding.
